Authorized OSHA Outreach Trainer

Contact RTC to plan on site inspections and training. Equipment operators can learn by observing equipment inspection, load testing and certification. Associated operator training will increase both safety and efficiency. Equipment and operator requirements can be met in a combined program that offers quick and practical results for all lifting requirements.

Rigging Training Consultants, Inc., provides operator and safety training courses to OSHA requirements and conducts on-site safety surveys including slings, rigging and crane inspections, boom truck/fork lift trucks, scaffolding and OSHA inspections.

RTC provides standard and specialized rigging equipment, connectors, attachments, supplies and rigging and lifting operator manuals and instructions.
